Innovative Products

Comprehensive Line of Packaging Solutions

Kraken Automation Inc. designs, engineers, manufactures, markets and sells packaging/process machinery and fully automated systems for domestic and international industries. Kraken Automation technology developments represent some of the newest, fastest and most reliable product feeding and conveying systems in the world today. We have extensive experience in the food, chemical and pharmaceutical industries.

With a wide array of innovative, quality Packaging/Process machinery solutions to choose from, and our highly skilled engineers we are confident that we can be a valued resource to increase your packaging and processing line performance and efficiency.

**Total Plant-Floor
Automation Solutions**

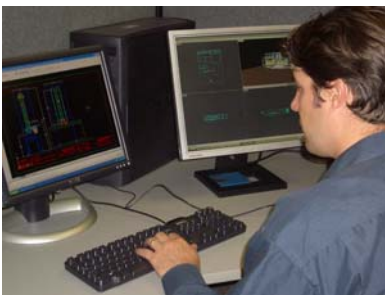

Complete, Integrated Automation Solutions for all your Plant-Floor Requirements

Whatever your systems integration requirements are, projects small, to large turnkey systems, Kraken Automation's Integrated "Plant -Floor" concept will help to simplify your packaging/process requirements. Chances are, we have already solved your specific challenge/s with industry applied solutions. Solutions that customers like yourself are benefiting from and using to keep them ahead of their competition. We know it's no simple task to integrate a manufacturing process and packaging line automation system. With the help of Kraken Automation we can integrate an intelligence system that will coordinate individual, stand-alone automated systems to perform optimally as one entity. No matter the requirement, from Electrical, Control Panels, Instrumentation and Control, to PLC programming OI and HMI, Robotics and large Packaging systems.

**Comprehensive Design
Engineering Services**

Factory Automation Specialists

The company has a team of specialists, including engineers, technologists and electricians, addressing a wide spectrum of disciplines and technologies. Our qualified staff with extensive industry applied experience in packaging/automation technology, services Industrial and Commercial clients in Canada, U.S.A and throughout the world.

The initial steps of our services begin with a briefing to assess your in-plant packaging automation/process requirements. This may include a plant tour with an audit of current processes which may immediately highlight short-comings of existing machinery and processes. We will take you step-by-step through every process, and advise you to what are some of the preliminary steps or solutions needed to improve current systems. We offer a comprehensive Engineering services package.

Customer Service

Personalized Service Every Step of the Way

At Kraken we pride ourselves on the ability to serve customers throughout North America and the rest of the world with quality, reliable packaging products and technical expertise second to none. The reason for our success has been based on our ability to listen to our customers needs and to be able to deliver quickly.

Looking at our product sampling you quickly identify that they represent the most innovative and newest technology available on the market today. At Kraken Automation we are dedicated to customer service excellence...from idea/concept design, fabrication and testing, through to commissioning. We roll our sleeves up and take you every step of the way.

**KRAKEN KSIT-100
Standard Infeed and
Transfer System**

Ideally suited for "Bag-In Box" applications

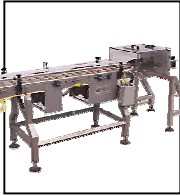

**KRAKEN KPART-300/50
Product Accumulator
Refeed Transfer System**

Ideally suited for re-feeding orphaned product back into the process.

**KRAKEN KCCO/S-30
Kraken KCCO/T-10
Case Conveying/
Orientation System**

Industry robust high-speed case conveying.

**KRAKEN KSBIT-240
Servo Smart-Belt Infeed
Transfer System**

Precision high speed Infeed and transfer system for multiple bagging.

**KRAKEN KSRC/MD-240
Servo Reject and
Conveying System**

Economical high speed Servo -Reject and conveying.

**KRAKEN KSCF-30
Kraken KTCF-10
Case Flippers**

High speed case orientation systems (30 cases per minute)

**KRAKEN KSTM-240
Standard Servo Transfer
Module**

High speed Servo Plug N' Play transfer Integrated to any infeed.

**KRAKEN KSR-240
Servo Paddle Reject
Conveying System**

Ideally suited for high speed product rejection requirements: metal detection, open case flap etc.

**KRAKEN Conveyor
Systems**

Gravity Rollers
Belt
Air Table

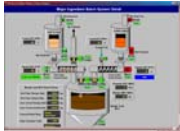

**Comprehensive Design
Engineering Services**

**Design Engineering-
From Concept to
Implementation**

**Systems Integration/
Project Management/
Commissioning**

**Packaging & Process
Automation Systems-
HMI/OPI/SCADA**

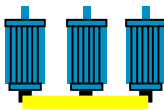

**CAD Drawing Services
Applicable to any Project-
Electrical
Process
Packaging
BID Document**

**Automation PLC
Programming Services**

**Packaging Machinery
Upgrades/Relocates**

Servo Technology Conversion

Converting old mechanical technology to state-of-the art precision, high-speed infeed & delivery systems

**Control Panels
System Assessment
Panel Design
Panel Equipment Spec.
Panel Assembly
Testing
Installation**
