

## Product Highlights

Factory Automation Solution Innovators

# KRAKEN KPFS/VS-100, Product Stacker/Accumulate, Vision, Detect/Reject and Feeder System

(Pizza application shown)

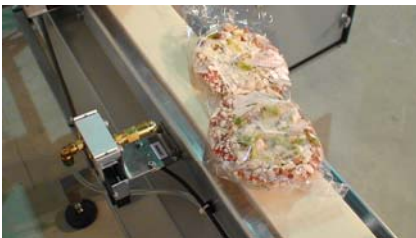

**Looking for a flexible, economical automation solution to take away costly manual packaging processes? Here is an ideal economical solution for multi-pack scenarios- applied to a broad range of products and industry applications**

The Kraken product stacking solution has a very small footprint requirement and incorporates a vision system for product quality (product image detection) as well as air blow-off.

### System Features and Benefits at a Glance:

- Total solution with fully automated product detection vision and reject system with product stacker.
- Up to 100 PPM (products per minute)
- Versatile/flexible technology easily applied to a wide range of products and industries.
- Portable/modular system and easily integrated into existing plant processes.
- Stainless steel food grade design
- Best suited as an economical solution where product stacking might be required and current processes used are manual labor cost intensive.
- Small foot print requirement

Product Reject Air Blow-off
